## **REMOTE LEARNING MODULE**

Subject: CS Author: ACR/GMA Created: 14.07.20 Updated: N/A

Subject:	CS			Teacher (if applicable	e):	CMI / GMA		
Year:	9			Ability/Class (if applice	able):	Mixed		
Module title:	Programming in Pytho	on						
Duration:	2 weeks	4 weeks		6 weeks 📃	8 wee	eks 🗌	Other:	
Intent								
Intent Statem society. How	ent - at Landau Forte A are you trying to acco	Amington, we belie mplish this, with this	eve learr s module	ning powerful knowledg ??	ge help	os students achi	ieve and creates a fairer	
To support the	e learning of pupils a re	emote environmen	t whist sł	kill keeping in line with t	he subj	ject aims and A	Academy values.	
Aims - what d	o you want pupils to b	e able to know an	d do by	the time they finish this	modul	eŝ		
Can understa and data rep Can analyse solve such pro	Can understand and apply the fundamental principles and concepts of computer science, including abstraction, logic, algorithms and data representation Can analyse problems in computational terms, and have repeated practical experience of writing computer programs in order to solve such problems							
Academy val in this module	lues – at Landau Forte ??	Amington, we war	nt studer	nts to be ambitious, bra	ve and	d kind. How are	these values promoted	
Brave: Empower pupils to become digitally literate in order to able to use, and express themselves and develop their ideas through, information and communication technology.								
Ambilious: Delivery of challenging concepts and laeas.								
Kind to become digitally literate in order to become active participants in a digital society and workplace.								
Content – wh	at is being covered, er	nsuring breadth & a	depth?	National Curriculum/E to the NC or Exam Spe	Exam Sp ec?	pecification - h	ow does the content link	

<ol> <li>Programming basics</li> <li>Inputs</li> <li>Variables and Operators</li> <li>Iteration</li> <li>Data Structure</li> <li>Subroutines</li> </ol>	Use two or more programming languages, at least one of which is textual, to solve a variety of computational problems; make appropriate use of data structures [for example, lists, tables or arrays]; design and develop modular programs that use procedures or functions					
Powerful Knowledge - what powerful knowledge is included in students to know, so that when they leave school they can end backgrounds?	this module? Consider what knowledge is it important for our gage in and lead discussions, with people from the most advantaged					
How to program / Concepts of programming Abstraction and Decomposition.	How to program / Concepts of programming Abstraction and Decomposition.					
Implementation						
KEY	CONCEPTS					
Key Concepts – what are the key concepts being taught?	<b>Progression</b> – how will studying these key concepts support progression to the next academic year, or key stage?					
Inputs: Text based programming.						
Variables and Operators: Types, uses and selection.	The study of programming language aids the students wanting to progress to GCSE computer science in understanding the concepts of a text bases programming language needed to not only complete their programming project, but also to belowith the					
	theory needed for the second exam paper.					
Data Structure: Lists and arrays.	The overarching concepts of programming also give good theorems to problem solving which relate to every aspect of the					
Subroutines: Definition and creation. Of subroutines.	wider world					
LEARNING						

<b>Synchronous</b> – what are the synchronous aspects of the module, including new material taught?	Asynchronous – what are the asynchronous aspects of the module, including deliberate practice?		
In a group / live lesson there will be opportunity for discussion around the modelling of the tasks by the teacher	Independently there will be opportunity each lesson to complete several programming tasks, set by the teacher, via an online IDE called repel.it.		
ENG	AGEMENT		
Accessibility – how are you going to ensure students without ICT can engage with this module?	Disengager not engagi	<b>ment</b> – how are you going to ensure students who are ng with this module are identified and supported?	
Engage with pupils over Print as a booklet and post home.	Contact pu Contact ho Contact ho Contact ho Contact ho	upil via Edulink. ome via Edulink. ome via phonecall. ome via CL. ome via SLT.	
FEI	EDBACK		
End of Module – what is the end of module assessment, which	<b>Review Poir</b>	nts – what takes place at the review points, to monitor	
will be used to evaluate the knowledge and skills gained?	the progres	s of learners and provide feedback, or support?	
A multiple choice assessment will be delivered via an online form to evaluate knowledge. Skills will be assessed through exit ticket / improvement templates.	2 Weeks	Pupils answer exam style questions then upload to teams, this is then marked via a rubric and pupils given an opportunity to improve their work	
	4 Weeks	Pupils answer exam style questions then upload to teams, this is then marked via a rubric and pupils given an opportunity to improve their work	
	6 Weeks	End of unit test given on MS Forms	
	8 Weeks		
	Other		

**Delivery** (please note - a two week remote learning module may only take one lesson cycle)

		1) Lesson Type (remote or blended)		2) DNA (Do Now Activity/Reading)			3) Learning Intentions (what, why & how)	
		Remote (live on MS Teams and remote as study) Blended (live in classroom and remote as study)		BEBRAS Activity	What Why How	Prog Unde prog E 4 - 5	ramming basics erstand the basic commands of ramming I can define input output and variables.	
1						5 +	I can apply my knowledge to c brief.	x
		4) New Material		5) Check for Understanding		6) F	Prepare for Practice	
	ber of lessons in cycle:	(previous learning/ new material) Data types, Variables, Constants, input/output, String handling operations, Arithmetic Operations, Sequence. Live lesson supported by PPT and Workshee	et.	(questioning/checking) The starter is used again later in the slides to check for understanding of new knowledge. In live lesson using hand up or chat function.	At the tas of the exc one way such the the stude Modelling	sk stag ample of cor proble nt in c g in pr	model/scattold) ge the teacher will model one es, making it clear that this is just mpleting the problem and as em can still be attempted by a different way. esentation mode of teams.
